WORKING WITH THE MOON

Simple ways to work with the moon phases

The moon has always been a quiet guide.
It is steady, cyclical, and deeply connected
to the way we naturally move through life.

You don't need to do anything perfectly to
work with the moon. Simply noticing its
phases can help you slow down, reflect,
release, and begin again.

This guide is an invitation to reconnect
with a natural rhythm that's already within
you.

WORKING WITH THE RHYTHM OF THE MOON

The moon moves through predictable phases, yet it never looks exactly the same twice.

You might notice similar patterns in your own life. Moments of energy, rest, clarity, or reflection.

Working with the moon is simply a way of paying attention to these shifts, instead of pushing through them.

The moon can be a gentle reminder that:

- Rest is part of growth
- Change is natural, not something to fix
- There's wisdom in cycles, not constant forward motion

PHASES OF THE MOON

The moon moves through eight phases, but you don't need to follow each one closely.

It can be helpful to think of the cycle in four simple parts.

Sacred made simple.

Simple Themes:

- New Moon — set intentions
- Waxing Moon — take gentle action
- Full Moon — notice and release
- Waning Moon — rest and integrate

NEW MOON

What it looks like

The moon is dark or barely visible in the sky.

Common themes

- Beginnings • Stillness • Intention • Reset

What this phase invites

The New Moon is a pause.

A quiet moment before things begin again.

This is a beautiful time to

- Set intentions gently
- Reflect on what you want to grow
- Sit with possibilities, rather than answers

A moment to reflect

- What feels ready to begin?
- What do I want more of in this next cycle?

WAXING MOON

What it looks like

A sliver of light appears and slowly grows.

Common themes

- Growth • Momentum • Clarity • Expansion

What this phase invites

As the moon gains light, energy begins to build again.

This is a supportive time for small, intentional movement forward.

This is a beautiful time to

- Take a small step toward something that's been on your mind
- Follow what feels natural, without rushing
- Let things unfold at a steady pace

A moment to reflect

- What feels ready to move forward
- What feels supportive to focus on right now

FULL MOON

What it looks like

The moon appears fully illuminated.

Common themes

• Clarity • Illumination • Awareness • Release

What this phase invites

The Full Moon brings things into the light.

This can be a moment of clarity. You may notice what has been building, shifting, or asking to be seen.

This is a beautiful time to

- Let go of what no longer feels aligned
- Notice what has grown or changed
- Practice gentle honesty with yourself

A moment to reflect

- What feels ready to be released
- What feels clear or more visible now

WANING MOON

What it looks like

The light slowly fades as the moon returns to darkness.

Common themes

- Release • Rest • Integration • Closure

What this phase invites

As the light begins to fade, this is a natural time to slow down.

A moment to rest, reflect, and allow things to settle.

This is a beautiful time to

- Rest and give yourself space
- Let go of what feels complete
- Move through things without judgment

A moment to reflect

- What feels ready to be softened or released
- What you might want to carry forward

Working with the moon isn't about tracking every phase perfectly or doing rituals every month.

It's a relationship, not a routine.

You might simply notice the Full Moon once in a while.
Pause during a New Moon.
Or become more aware of the natural cycles
happening in your own life.

Even small moments of reflection still matter.

The moon doesn't rush.
And you don't have to either.

Thank you for being here.

Powerful Intention was created as a space for small, intentional moments.

Not to add more to your life,
but to give you something to return to when you need it.

When everything feels a little off,
you don't need to figure it all out.

Sometimes, a small shift in attention is enough.
